ABSTRACT:

PURPOSE: To provide an inexpensive tube container which is suitable for packing of medicines, dyestuffs, adhesive, toothpaste cosmetics, etc., and excellent in retaining of scent, gas-barrier, chemical resistance, flexibility, and transparency, and further, in which the aromatic components in the contents are hardly absorbed.

CONSTITUTION: A tube container is provided with a body made of a laminated material having a gas barrier layer composed of the innermost layer 7 and the outermost layer 1 made of polyester resin or polyacrylonitrile resin, and the intermediate layer made of an ethylene-vinyl alcohol copolymer layer 3 and a biaxially oriented polyethylene terephthalate layer 5.
